

# COVID-19

Guidance for back-to-school

## Sending Students Home

Students may be sent home if they exhibit the following symptoms:

### One from this list:

- Fever
- Shortness of breath
- Severe Cough
- Loss of taste or smell

### Two from this list:

- Sore throat
- Muscle aches
- Vomiting\*
- Diarrhea\*
- Fatigue
- Headache
- Nasal congestion/runny nose

In both cases, students may be sent home until: **10 days** since symptom onset **AND** symptoms improving **AND** fever free without medication.

If student is seen by a healthcare provider, guidance will follow their recommendation. Students waiting COVID-19 tests results should NOT be sent to school.

\*Vomiting and diarrhea alone or together should exclude student from school, but may not be considered COVID-like and will be treated per regular clinical guidelines.

## Confirmed COVID-19 Cases

Students who have been in direct contact with a confirmed COVID-19 case must be quarantined for 14 days.

Direct Contact = within 6ft for over 15 minutes.

## Remember the 3 Ws!

Wear your mask

Wash your hands

Watch your distance

## Immunizations

Immunizations should be turned in by September 25!

For more information, please contact your school nurse.
